Marvellous Ogbo

Mobile Software Engineer

+234 (810) 159-9745 | marvellousogbo0@gmail.com | marvellousogbo.com

4+ years building production mobile/web applications and SDKs across fintech, healthcare and consumer products. Experienced with payment integrations including Paystack and Remita, REST APIs, state management, secure mobile storage, notifications, and native Android/iOS development. Built a native identity-verification SDK using Kotlin and Swift, with Flutter and React Native bridges.

Focused on creating smooth, performant mobile/web experiences that not only look polished but also work seamlessly for real users.

Skills

- **Languages & Frameworks**: Flutter, Dart, Swift (SwiftUI), Jetpack Compose, Kotlin, TypeScript, ReactJs/ NextJs
- **Architecture & Integrations**: BLoC, Riverpod, Dart FFI (with Go), Platform Channels, MVVM, Clean Architecture, State Hoisting, Firebase
- **Tools & DevOps**: Visual Studio Code, Android Studio, Xcode, Git/GitHub, Codemagic, Fastlane, FVM (Flutter Version Management), CI/CD Pipelines

Experience

Mobile Engineer | CreditChek, Nigeria | Remote *(Oct. 2025 - Present)*

- Engineered and maintained a production-ready mobile SDK (Flutter, Kotlin, Swift and React Native), enabling third-party apps to seamlessly integrate CreditChek services with minimal setup time.
- Developed the consumer mobile app with a strong focus on performance, clean architecture, and a smooth user experience.
- Worked closely with product, backend, and design teams to turn business requirements into intuitive, high-quality mobile solutions.

  Projects: Creditcliq, approval_android, approval_ios, approval_flutter, approval_react_native

Mobile Developer (Flutter/Firebase) | EV1, United Kingdom | Remote *(Nov. 2025 - April 2026)*

- Integrated Firebase services for seamless data synchronization and backend functionality.
- Implemented responsive design principles and custom animations to create engaging, fluid user expriences across all devices.
- Collaborated alongside developers, designers, and project manager to deliver high-quality solutions

Mobile Developer (Flutter) | Soft-web LTD, Nigeria | Remote *(Jan. 2025 - Dec. 2025)*

- Building, maintaining, and optimizing high-quality Flutter applications .
- Ensuring app quality, responsiveness, and seamless integration with APIs and third-party services.

  Billpadi iOS, Billpadi Android, Billporte Android, Billporte iOS

Frontend Developer (ReactJs/NextJs) | Reliabyte, Nigeria | Remote *(Aug. 2025 - Oct. 2025)*

- Engineered a Student Management Dashboard utilizing Next.js, focusing on optimized rendering, responsive layouts, and clean architecture to streamline administrative workflows.
- Developed a comprehensive Hospital EMR (Electronic Medical Records) system using React, implementing robust global state management to handle complex, real-time medical data seamlessly.
- Dockerized frontend applications to ensure environment consistency across development and production, successfully deploying and configuring them on a local server.
- Collaborated closely with Project Managers and Backend Engineers to translate complex business requirements into intuitive UIs, integrate robust RESTful APIs, and deliver high-quality, scalable solutions.

Mobile Developer (Flutter) | Uneleap, United Kingdom | Remote *(Nov. 2022 - Feb 2025)*

- Mobile application development and maintenance
- Collaboration with various teams to determine, design, and implement new features
- Ensuring the performance, quality, and responsiveness of applications
- Working with APIs to integrate third-party services and data sources

Mobile/Frontend Developer (Intern) | In-motion, PH, Nigeria | On-Site *(Aug. 2021 - Jan. 2022)*

- State management techniques for managing app state effectively
- API consumption for seamless data integration
- Responsive design principles to enhance user experience across devices
- Worked alongside senior developers, designers, and project managers
- Gained experience in team-based development, improving communication and coordination

Education

University of Port Harcourt *(Sep. 2019 - Nov. 2023)*

BA (Hons) - Computer Science
